# Statement by the Board of Directors and the Executive Board

The Board of Directors and the Executive Board have today discussed and approved the annual report of Maersk Container Industry A/S for the financial year 1 January – 31 December 2020.

The annual report has been prepared in accordance with the Danish Financial Statements Act.

It is our opinion that the financial statements give a true and fair view of the Company's financial position at 31 December 2020 and of the results of the Company's operations for the financial year 1 January – 31 December 2020.

Further, in our opinion, the Management's review gives a fair review of the development in the Company's operations and financial matters and the results of the Company's operations and financial position.

We recommend that the annual report be approved at the annual general meeting.

Copenhagen, 12 May 2021

### Independent auditor's report

To the shareholder of Maersk Container Industry A/S

#### **Opinion**

In our opinion, the Financial Statements give a true and fair view of the financial position of the Company at 31 December 2020, and of the results of the Company's operations for the financial year 1 January - 31 December 2020 in accordance with the Danish Financial Statements Act.

We have audited the Financial Statements of Maersk Container Industry A/S for the financial year 1 January - 31 December 2020, which comprise income statement, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies ("financial statements").

#### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Statement on Management's Review**

Management is responsible for Management's Review.

Our opinion on the financial statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, in our view, Management's Review is in accordance with the Financial Statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement in Management's Review.

#### Management's responsibility for the financial statements

Management is responsible for the preparation of Financial Statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

#### Auditors' responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and

## Independent auditors' report

are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## Management's review

### **Operating review**

#### Principal activities of the company

Maersk Container Industry A/S (MCI) is a fully owned subsidiary of A.P. Møller-Mærsk A/S (<a href="http://www.maersk.com">http://www.maersk.com</a>) that since 2019 has exclusively been a trading company for reefer and spare parts for reefer containers and the Danish affiliate of the MCI Group (<a href="http://www.mcicontainers.com">http://www.mcicontainers.com</a>), one of the global leaders in container manufacturing within reefer containers and reefer machines. MCI comprises of the MCI Group's headquarters based in Copenhagen and Tingley, Denmark which includes global sales and marketing, R&D and test centre, technical and administrative support functions as well as a global service centre. Further, MCI was, via subsidiary, the owner of the reefer container factory in Chile which ceased operations in June, 2018 and the site was sold in April, 2020. MCI's dry container factory in Dongguan ceased operations in January, 2019 and the site was sold in November 2020. MCI continues to own and operate its remaining manufacturing site for reefers in Qingdao, China.

#### **Development in activities and financial position**

The total market demand for marine reefers was higher than the previous year ~142,000 vs. 2019 of ~133,000 units, an increase of ~7% YoY. Against this market growth, MCI was able to maintain total market share while increasing sales to 3<sup>rd</sup> party customers from 26,600 to 37,000 YoY. This increased 3<sup>rd</sup> party market share and included sales for the first time to several customers and marked a solid expansion of sales coverage for Star Cool.

In early 2019, MCI announced the exit from the dry container business and closure of MCI's Dongguan factory. This has allowed MCI to focus its resources on the more profitable marine reefer segment and achieve improved financial resilience. MCI's sales remained relatively constant v 2019 at DKK 3.9Bn.

The net result for MCI increased to DKK 174m in 2020 compared to DKK in 156m in 2019. The result was in line with expectations and represents the continuing MCI business (reefer containers and reefer container services) except for DKK 8m relating to discontinued operations. The 2019 result was significantly impacted by discontinued activities, with the DKK 74m write down of the investment in Chile

The direct impact of Covid-19 on the MCI financials for 2020 has not been that significant. Our production site in Qingdao was closed for just over two weeks in February as a result of disruption in China during the initial outbreak. As a result, we lost around SCI capacity for this period. Additionally, low activity for travel and some project delays meant that our overhead costs were lower than anticipated.

#### Outlook

It is our expectation that reefer volumes will be flat in 2021, although they will continue to grow longer term due to increasing global demand for fresh products and other commodities. In addition, the conversion from aging reefer bulk vessel fleet to reefer containers is expected to continue over the coming years impacting demand positively for reefers.

Further to this demand outlook, it is expected the reefer box pricing will increase during 2021 but this is due to high raw material costs and will not therefore result in improved margins. Generally, the ocean container manufacturing market for reefer containers remains characterised by oversupply, and MCI expects this to continue for the near future.

Apart from building on MCI Star Cool technology's acclaimed leadership in Energy Savings, Controlled Atmosphere and refrigerant flexibility, a new revenue stream in selling connectivity hardware and related services, branded as 'Sekstant' is planned in the coming years. The launch of Sekstant has been delayed but the product has undergone trials with several customers in H2 2020.

Overall, with demand and margins for reefers expected to be relatively constant in 2021, MCI expects a result in 2021 on a par with 2020 for the continuing part of the business (~180m DKK). There remains some uncertainty on the business outlook due to potential for continuing COVID-19 disruption.

#### Risks and uncertainties

#### Operational risk

With manufacturing consolidated in one location, MCI does face some risk if there is an event impacting Qingdao/China vs. the rest of the industry.

#### Market risk

Maersk Container Industry operates in a market, that is significantly affected by the shipping industry and their financial strength. The underlining demand drivers for reefer transportation remains stable, but fluctuations are expected to continue.

#### **Currency risks**

Activities abroad cause earnings, cash flows and equity to be affected by the exchange rate developments, mainly USD. There are no speculative currency deposits. Exchange risks associated with investments in subsidiaries abroad are generally not covered as the company believes that a continuous hedging of such long-term investments will not be optimal based on a comprehensive risk and cost consideration.

#### Liquidity risk

The company is no longer dependent on having long-term financing, but MCIT is part the Maersk Group cash pool with the availability of credits.

#### **Environmental matters**

Maersk Container Industry A/S considers CSR to be an important part of our business. As to efforts made in 2020, we refer to the parent company, A.P. Møller-Mærsk A/S' sustainability report (<a href="https://www.maersk.com/business/sustainability">https://www.maersk.com/business/sustainability</a>).

#### Goals and policies for the under-represented gender

In March 2013 the Board adopted targets for the diversity of the company's shareholder-appointed board members with respect to the under-represented gender.

The Board believes that its members should be elected on the basis of their combined qualifications and at the same time recognises the advantages of a board comprising a wide range of backgrounds such as global experience, style, culture and gender.

Since 30 November 2019 one of the shareholder-appointed Board members is a woman and consequently, the 33% target for gender diversity has been met. One of the two employee-appointed members of the Board is also a woman since 5 May 2019. Additionally, two of the five members of the MCI A/S Advisory Board are also women, which means that we have strong momentum to balance under-represented gender to the Board level.

In accordance with A.P. Møller - Mærsk Board policy, MCI aims to attract qualified women to relevant management positions, but they are under-represented today and below Board level we are behind in our ambitions to achieve a stronger gender balance. The topic of gender equality is prioritised in management discussions within MCI and this is a focus area when identifying candidates to key positions. The Company is committed to fostering an environment which is equally open and attractive to all.

The Maersk gender diversity and inclusion policy was revised in 2019. The policy provides details of our targets and actions to increase gender diversity and is available on the Maersk website https://www.maersk.com/careers/maersk-culture/diversity.

To support our ambitions of increasing the number of women in management levels the following actions have been taken with the progress of each measured on an ongoing basis:

- To increase the number of women being recruited into MCI there is a target of no less than 40% of one gender to be hired for our job levels up to senior manager level (JL5). During talent reviews which take place for our senior job levels across the company, we measure all data by gender to allow us to assess the diversity of the talent pool.
- To support the retention of female employees, we introduced a global maternity leave policy in 2016 to enable women to return to work on a flexible hours basis, subject to criteria. The purpose is to increase the retention of women post maternity leave and this is supplemented with training on "returning to work". In the past year, we have had one employee (out of one) returning successfully from maternity leave.
- Across the company we have implemented training to help reduce the gender and other stereotype bias in decision making. The training is available to all employees and secured an 88% participation rate.

- Our employees and leaders also take part in events to mark international women's day and Maersk's diversity and inclusion week. The latter highlights female role models, involving panel sessions and a focus on gender stereotypes and the impact they can have on the future generation.
- 4 of our employees joined the Strategy for Success program which is specific for females and focuses on career challenges, personal brand and communication.

#### Events after the balance sheet date

There have been no significant or noteworthy events subsequent to the balance sheet date.

#### Notes

#### 1 Accounting policies

The annual report of Maersk Container Industry A/S for 2020 has been prepared in accordance with the provisions applying to reporting class C large enterprises under the Danish Financial Statements Act.

The accounting policies applied by the company are consistent with those of last year.

#### Applied exemption clauses in the Danish Financial Statements Act

In accordance with section 86(4) of the Danish Financial Statements Act, Maersk Container Industry A/S has not prepared a cash flow statement as this is included in the consolidated cash flow statement of the parent company, A.P. Møller-Mærsk A/S.

In accordance with section 96(3) of the Danish Financial Statements Act, the Company has not disclosed fees to the auditors appointed at the annual general meeting, as this is included in the financial statement of A.P. Møller-Mærsk A/S.

In accordance with section 112 of the Danish Financial Statements Act, the Company has not prepared consolidated financial statement as this is included in the consolidated financial statement of A.P. Møller-Mærsk A/S.

#### Foreign currency translation

On initial recognition, transactions denominated in foreign currencies are translated at the exchange rates at the transaction date. Foreign exchange differences arising between the exchange rates at the transaction date and the date of payment are recognised in the income statement as financial income or financial expenses.

Receivables, payables and other monetary items denominated in foreign currencies are translated at the exchange rates at the balance sheet date. The difference between the exchange rates at the balance sheet date and the date at which the receivable or payable arose or was recognised in the latest financial statements is recognised in the income statement as financial income or financial expenses.

#### **Income statement**

#### Revenue

Revenue from the sale of containers and reefer machines is recognised in the income statement when delivery and transfer of risk to the buyer have taken place.

#### **Notes**

#### Costs

Costs comprise direct and indirect costs for raw materials and consumables to generate revenue for the year.

#### Other operating income

Other operating income comprises items secondary to the activities of the Company, including gains on the disposal of intangible assets and property, plant and equipment.

#### Other operating costs

Other operating costs comprise items secondary to the activities of the Company, including losses on the disposal of intangible assets and property, plant and equipment.

#### Financial income and expenses

Financial income and expenses are recognised in the income statement at the amounts relating to the financial year. Financial income and expenses comprise interest income and expense, payables and transactions denominated in foreign currencies.

#### Tax on profit/loss for the year

Tax for the year comprises current corporation tax for the year and changes in deferred tax, including changes in tax rates. The tax expense relating to the profit/loss for the year is recognised in the income statement, and the tax expense relating to amounts directly recognised in equity is recognised directly in equity.

#### **Balance sheet**

#### **Intangible assets**

Intangible assets comprise large and long-term development projects.

Development project, that are clearly defined and identifiable, where the technical utilization rate, sufficient resources and a potential future market or development opportunity in the company can be detected, and where the intention is to produce, market or use the project, is recognized as intangible fixed assets, if there is sufficient assurance that the capital value of future earnings can cover production, sales and administration costs as well as the actual development costs.

Development projects that do not meet the criteria for recognition in the balance sheet are recognized as expenses in the income statement as the costs incurred.

#### **Notes**

Development projects that are capitalised are measured at cost less accumulated depreciation and impairment. An equal amount after tax is recognized in "Reserves for development projects" under equity. The reserve is reduced with depreciations. Depreciation is commenced when the development project is finalised. Cost includes direct cost pertaining to the development of development projects. Completed development projects, including software, are amortised on a straight-line basis over 3 years. Licenses are measured at cost less accumulated amortisation and impairment. Licenses are amortised on a straight-line basis over 3 years.

#### Property, plant and equipment

Land and buildings, plant and machinery, and fixtures and fittings, other plant and equipment are measured at cost less accumulated depreciation and impairment losses. Depreciation is provided on a straight-line basis over the expected useful lives of the assets. The expected useful lives are as follows:

Buildings 50 years Fixtures and fittings, other plant and equipment 3-10 years

Land is not depreciated.

Fixtures and fittings, other plant and equipment of less than DKK 50 thousand a unit as well as current assets are expensed in the year of acquisition.

The economic life and scrap value of all property, plant and equipment are re-evaluated every year.

#### **Investments**

Investments comprise investments in subsidiaries and are measured at cost. Where cost exceeds net realisable value, a write-down is made to this lower value.

#### Impairment of non-current assets

The carrying amount of intangible assets and property, plant and equipment as well as equity investments in group entities is subject to an annual test for indications of impairment other than the decrease in value reflected by depreciation or amortisation.

Impairment tests are conducted of individual assets or groups of assets when there is an indication that they may be impaired. Write-down is made to the recoverable amount if this is lower than the carrying amount.

The recoverable amount is the higher of an asset's net selling price and its value in use. The value in use is determined as the present value of the forecast net cash flows from the use of

#### Notes

the asset or the group of assets, including forecast net cash flows from the disposal of the asset or the group of assets after the end of the useful life.

#### **Inventories**

Inventories are measured at cost in accordance with the average cost method. Where the net realisable value is lower than cost, inventories are written down to this lower value.

Finished goods and goods for resale comprise the cost of raw materials, consumables, direct wages and salaries and indirect production overheads.

The net realisable value of inventories is calculated as the sales amount less costs of completion and costs necessary to make the sale and is determined taking into account marketability, obsolescence and development in expected selling price.

#### Receivables

Receivables are measured at amortised cost.

Write-down is made for bad debt losses where there is an objective indication that a receivable or a portfolio of receivables has been impaired. If there is an objective indication that an individual receivable has been impaired, write-down is made on an individual basis.

#### **Prepayments**

Prepayments comprise prepaid expenses of freight, subscriptions and rebate.

#### Cash and cash equivalents

Cash comprises cash balances and bankbalances.

#### Reserve for development costs

Reserve for development costs includes recognized development costs. The reserve can not be used for dividends or coverage of losses. The reserve is reduced or dissolved if the recognized development costs are depreciated or deducted from the company's operations. This is done by transfer directly to equity reserves.

#### **Dividends**

Proposed dividends are recognised as a liability at the date on which they are adopted at the annual general meeting (declaration date). The expected dividend payment for the year is disclosed as a separate item under equity.

#### Notes

#### Corporation tax and deferred tax

Maersk Container Industry A/S is jointly taxed with the parent company, A.P. Møller-Mærsk A/S. The current Danish corporation tax is allocated between the jointly taxed Danish companies in proportion to their taxable income (full absorption with refunds for tax losses).

Current tax payable and receivable is recognised in the balance sheet as tax computed on the taxable income for the year adjusted for tax on the taxable income of prior years and for tax paid on account.

Deferred tax is measured using the balance sheet liability method on all temporary differences between the carrying amount and the tax value of assets and liabilities based on the planned use of the asset or settlement of the liability. However, deferred tax is not recognised on temporary differences relating to goodwill non-deductible for tax purposes, office premises and other items where the temporary differences arise at the date of acquisition without affecting either profit/loss or taxable income.

Deferred tax assets are recognised at the expected value of their utilisation within the foreseeable future, that is expected to be utilised within the joint-taxation; either as a set-off against tax on future income or as a set-off against deferred tax liabilities in the same legal tax entity. Any deferred net assets are measured at net realisable value.

Deferred tax is measured in accordance with the tax rules and at the tax rates applicable at the balance sheet date when the deferred tax is expected to crystallise as current tax. Changes in deferred tax as a result of changes in tax rates are recognised in the income statement and equity, respectively.

#### **Provisions**

Provisions comprise anticipated costs related to warranties. Provisions are recognised when, as a result of past events, the Company has a legal or a constructive obligation and it is probable that there may be an outflow of resources embodying economic benefits to settle the obligation. Provisions are measured at estimated net realisable value and are by nature subject to uncertainty.

Warranties comprise obligations to make good any defects within the warranty period. Provisions for warranties are measured and recognised based on past experience.

#### Liabilities other than provision

Financial liabilities are recognised at the date of borrowing at the net proceeds received less transaction costs paid. In subsequent periods, the financial liabilities are measured at amortised cost, corresponding to the capitalised value using the effective interest rate. Accordingly, the difference between the proceeds and the nominal value is recognised in the income statement over the term of the loan. Other liabilities are measured at net realisable value.

#### **Notes**

#### **Segment information**
